INTERIORS

CLAY 300 BASIN

Specification Sheet

Designed with smaller spaces in mind, this compact basin is ideal for powder rooms and petite bathrooms. Its low, rounded profile features a subtly defined rim and a smooth, continuous form - small in scale, yet generous in character.

Available Glazes / Finishes:

30070 COAST

30091 STORM

30006 RIVERGUM

300OG OLIVE

30008 POPPYSEED

30027 SHALE

30002 WHITE OCHRE

30003 ROSE QUARTZ

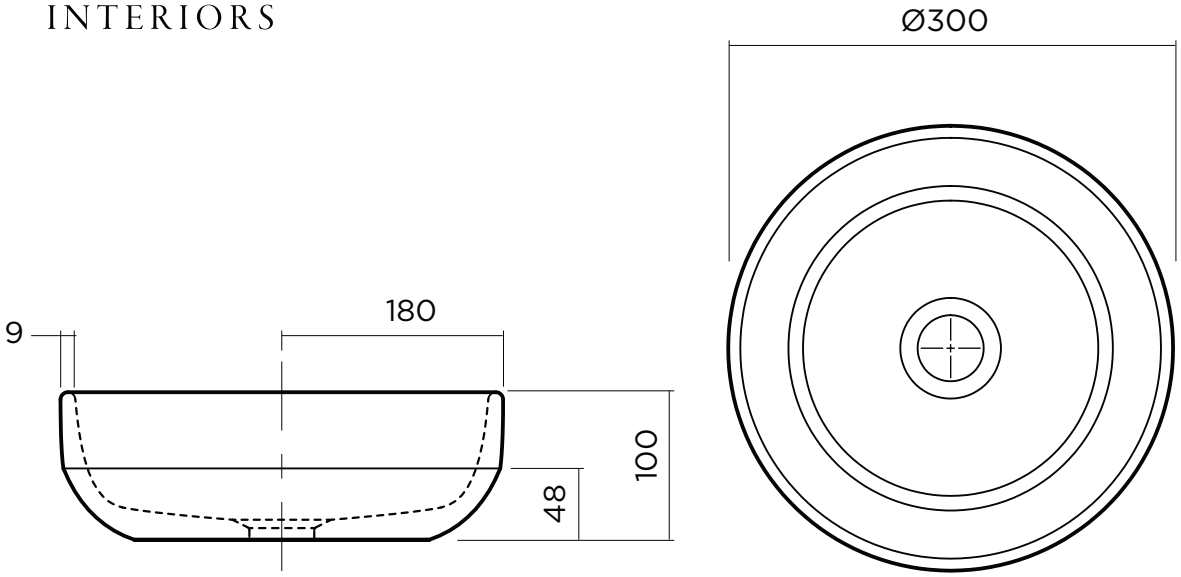

30024S SAND

Disclaimer: Due to the natural characteristics of clay and our manufacturing processes, variations in shade and colour are an inherent feature of ceramic products red at high temperatures. Our reactive glazes vary from piece to piece, ensuring that no two products are exactly alike. If an exact shade or colour match is important, we strongly recommend viewing and purchasing the products in person.

ROBERT GORDON

INTERIORS

Your Robert Gordon Interiors basin must be installed in accordance with RGI's supplied instructions, including, where specified, by qualified and authorised tradespersons. Do not modify or adapt your basin for the purpose of installation. Protect your basin from accidental damage when installed as part of a building process to avoid chips, cracks, and scratches from breakage.

Installation requirements

- Product must be installed by a qualified and licensed plumber.
- Use the correct waste to suit your basin. Each basin is supplied with technical specifications showing the recommended plug and waste connection size.
- Ensure no water is trapped under the sink. A silicone bead around the perimeter of the base of the basin is required to ensure that no water penetrates under the basin. If water does become trapped under the basin due to incorrect installation, water marks may appear.
- Install waste using 100% silicone and ensure it is left to dry for at least 24 hours prior to use
- Waste should be fixed hand tight only and not tightened mechanically.

Safety tips / Maintenance

- Avoid placing hot items such as hair straighteners directly onto your basin product. Although the basin is heat resistant, excessive localized heat may cause damage, including thermal shock.
- Avoid placing or dropping anything heavy or sharp onto your basin product.
