Available Glazes / Finishes:

40070 COAST

40091 STORM

40006 RIVERGUM

400OG OLIVE

40008 POPPYSEED

40027 SHALE

40002 WHITE OCHRE

40003 ROSE QUARTZ

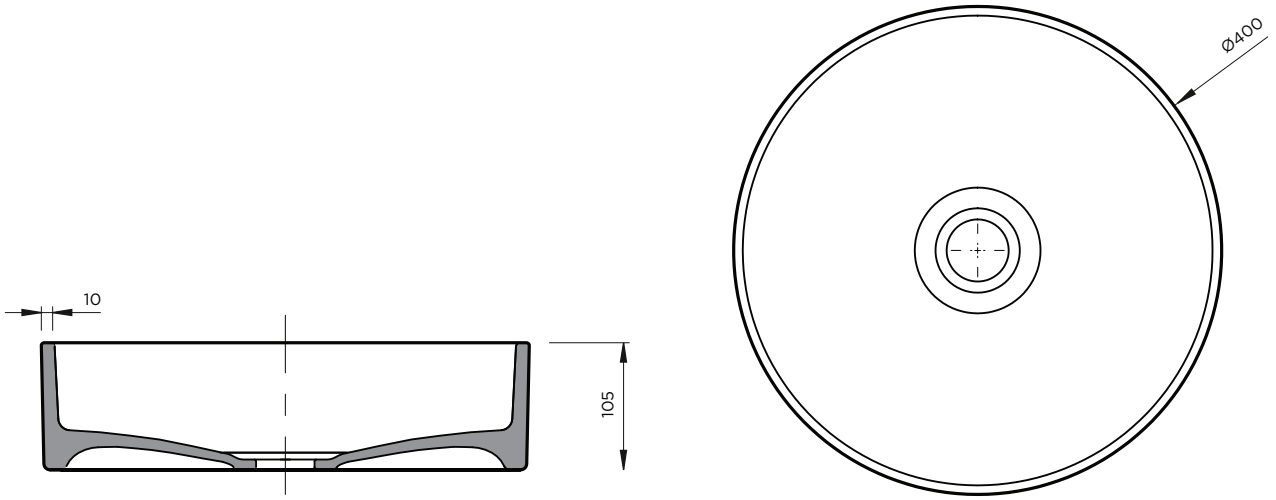

40024S SAND

Disclaimer: Due to the nature of clay and our manufacturing process, variations on shade and colour are a natural feature of ceramic product fired at high temperature. Our glaze formulas are reactive and vary from piece to piece. No two pieces are like. If you are wanting an exact shade, we would strongly recommend purchasing in person so you can see it in real life

ROBERT
GORDON
INTERIORS

Your Robert Gordon Interiors Basin must be installed in accordance with RGI's supplied instructions, including, where specified, by qualified and authorized tradespersons. Do not modify or adapt your basin for the purpose of installation. Protect your basin from accidental damage when installed as part of a building process to avoid chips, cracks, and scratches from breakage.

Installation requirements

- Product must be installed by a qualified and licensed plumber.
- Use the correct waste to suit your basin. Each basin is supplied with technical specifications showing the recommended plug and waste connection size.
- Ensure no water is trapped under the sink. A silicone bead around the perimeter of the base of the basin is required to ensure that no water penetrates under the basin. If water does become trapped under the basin due to incorrect installation, water marks may appear.
- Install waste using 100% silicone and ensure it is left to dry for at least 24 hours prior to use
- Waste should be fixed hand tight only and not tightened mechanically.

Safety tips / Maintenance

- • Avoid placing hot items such as hair straighteners directly onto your basin product. Although the basin is heat resistant, excessive localized heat may cause damage, including thermal shock.
- Avoid placing or dropping anything heavy or sharp onto your basin product.
