

Installation Instruction

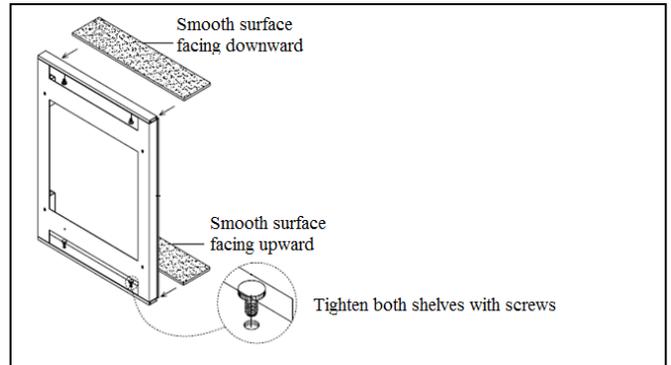

For safety reasons, we kindly ask you to read the installation and user guide before fitting and using the product. The installation shall be carried by a licensed electrician. The luminaire must be permanently installed in the electric system and placed in the correct zone.

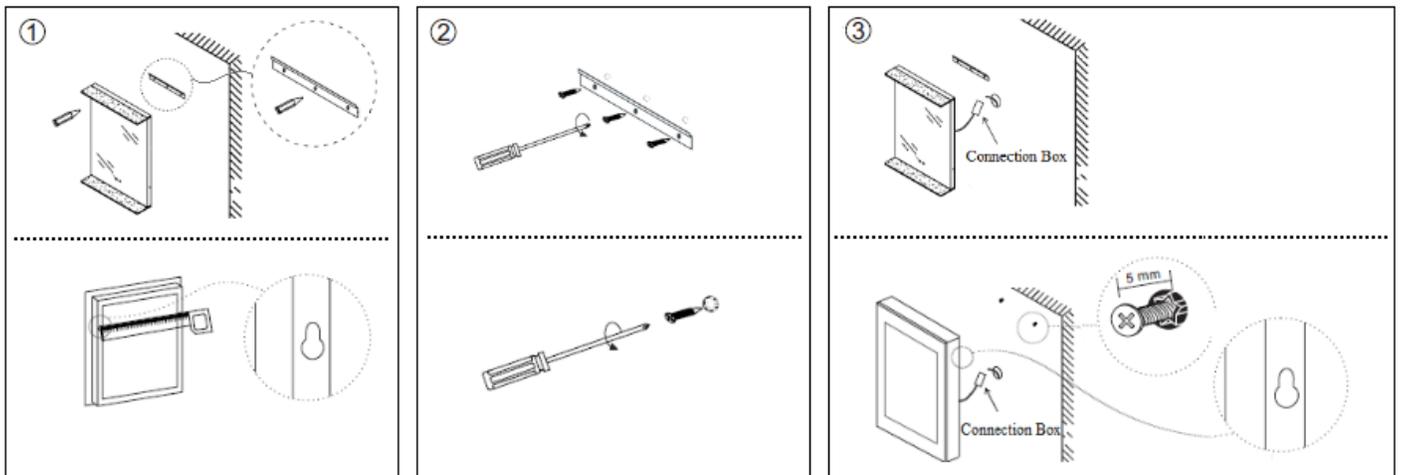

You would need:

Only applicable to Nova series:

Installation

1. Ensure intended installation location is at Zone 2 or higher (see diagram) and has bearing wall for installation that can afford the weight of mirror.
2. Outline the corner of mirror on the wall; Place the provided frame hanger within the drawn outline at intended height. Mark the location of the frame hanger and ensure it is parallel using levelling tools
OR
locate the two hanging holes and mark it on the wall. Ensure both are parallel using levelling tools.
3. Drill hole on the marks with 6-8mm drill and insert wall plug into the holes. Screw in the frame hanger OR screw provided.
4. Connect wire from the back of the mirror to mains wire in accordance with current IEE regulations. A second person will be needed to hold the mirror in place.
5. Hang the mirror on the frame hanger OR screws. Remove the liner of the double-sided tape to ensure the seamless gap between wall and mirror.

Manual Instruction

1. Touch switch for light and other functions (Demister and Bluetooth)

- a. Switch on/off by pressing on the button
 - i. The function is off, when the button light is lit
 - ii. Vice versa, the function is on, when the button light is out

2. Infrared sensor switch

- a. Ensure there is 60mm gap between the sensor and any other object in any direction
- b. Beware that reflective materials within 50cm from the sensor can affect the responsiveness of the switch
- c. Switch on/off by waving gently

3. Digital Clock

- a. The digital clock is operating when the light of clock button is out
- b. To adjust the time, press and hold the clock button for 3 seconds or until the first digit starts flashing. Press the clock button again to adjust the time. Once the hours of time are set, release finger and wait for the minute digits to flash before setting the minutes.

4. Bluetooth speaker

- a. Press the Bluetooth button until you hear the tone
- b. Go to Bluetooth settings on your device and select "YH-BT02" from the list
- c. Control the volume and playlist via device

General Information

- When unpacked, never placed the mirror upright on a hard surface. Always lay on soft surface
- Switch off electrical supply at mains before fitting
- For plasterboard wall, specialist fixing should be purchased from DIY or hardware stores
- Do not use cleaners containing ammonia, this will void warranty
- Isopropyl alcohol or methylated spirits are preferred for cleaning mirrors
